

Cardiologist Report: Dr. Smith

Patient: Maria Mustermann

Date: March 30, 2024

Attending Physician: Dr. Smith, Specialist in Cardiology

Findings:

During today's examination, Maria Mustermann showed no signs of acute heart problems. The EKG and stress tests conducted indicate a normal heart function. Her blood pressure is within the normal range. There are no indications of arrhythmia or other cardiological abnormalities.

Recommendations:

- Continue regular physical activity to maintain heart health.
- Annual cardiological examination for early detection of possible heart diseases.
- Healthy diet focusing on heart-healthy foods.

Notes:

Maria should immediately report any symptoms like chest pain, shortness of breath, or unusual heartbeats.
