

# Dermatologist Report: Dr. Johnson

**Patient:** Maria Mustermann

**Date:** March 30, 2024

**Attending Physician:** Dr. Johnson, Specialist in Dermatology

## Findings:

Maria Mustermann presented healthy skin with no signs of severe dermatological issues. A small mole on her right arm was examined and found to be benign. There are no signs of skin cancer or other serious skin diseases.

## Recommendations:

- Regular self-examination of the skin for new or changing moles.
- Protection against UV radiation by applying sunscreen with a high SPF.
- Annual dermatological screening to detect changes in the skin early.

## Notes:

Should new skin changes occur or existing moles change, an immediate dermatological examination is recommended.
